

### PROJECT TYPE

Onsite Compression and Distribution

### LOCATION

Australia

### INDUSTRY SERVED

Transportation

### AREA SERVED

East Coast of Australia

### CLIENTS

Ampol

### USE APPLICATIONS

City buses, ferries, trucking, and materials handling

### EQUIPMENT

C200 and Mobile Fueler 520 bar equipment

### PRODUCTION CAPACITY

200 - 400 kg per day comp.

### OWNERSHIP TERMS

Customer (Ampol) Owned

### STATUS

In development for 2024 deployment

## OVERVIEW

OneH2 is working with Ampol to deploy hydrogen equipment in Australia. The initial focus will be on hydrogen compression, distribution, and storage across the Eastern Seaboard of the country. Ampol owns and operates one of two oil refineries in Australia. Australia will be home to the first OneH2 hydrogen projects deployed by Ampol.

## SCOPE

- Capable of compressing 200 - 400 kg of hydrogen per day
- Serves the transportation industry
- Utilizes hydrogen compressors and mobile fuelers

## HIGHLIGHTS

- In development with deployment in 2024
- The first OneH2 hydrogen project with Ampol
- Ampol owns one of two oil refineries in Australia
