

## PROJECT TYPE

Onsite Production Facility

## LOCATION

Oshawa, Canada

## INDUSTRY SERVED

Automotive manufacturing

## AREA SERVED

Oshawa, Canada

## CLIENTS

NDA

## USE APPLICATIONS

Warehouse Operations: Forklifts and related equipment

## EQUIPMENT

Site-wide hydrogen dispensers converted via pipeline to onsite compressors

## PRODUCTION CAPACITY

Up to 500 kg compression capacity per day

## OWNERSHIP TERMS

OneH2

## STATUS

Online and in active production

## OVERVIEW

This client is one of OneH2's largest customers. OneH2 has deployed delivered solutions, scaled hydrogen ecosystem plans, and product development specifically to meet their needs.

## SCOPE

- OneH2 provides delivered solutions, a scaled hydrogen ecosystem, and product development tailored specifically to their operating needs
- One of OneH2's largest customers
- 500 kg/day compression capacity
- Utilizes a site-wide hydrogen pipeline and onsite compressors

## HIGHLIGHTS

- Client's preferred hydrogen fuel supplier
  - Their hydrogen demand is driven by:
  - Regulatory & company needs for converting warehouse material handling equipment to zero emissions
  - Testing of new Fuel Cell units at various locations
  - Defense administration pilot goals for zero emissions and R&D
