

### PROJECT TYPE

Onsite Production Facility

### LOCATION

Wilmer, TX

### INDUSTRY SERVED

Hardware OEM

### AREA SERVED

Dallas, Texas area

### USE APPLICATIONS

Warehouse Operations: Forklifts and related equipment

### EQUIPMENT

2 x Dispenser  
Tube Trailers  
H200 generator  
Legacy 2 x PTG-50, 2 x PTC-50,  
2 x OCS-50

### PRODUCTION CAPACITY

300 Kg/Day

### OWNERSHIP TERMS

Customer Owned

### STATUS

Online and in active production

## OVERVIEW

This client utilizes an ~100 Kg/day generation system. OneH2 is upgrading their facility to generate an additional 200Kg/day, with the potential to convert other hydrogen-production sites to higher output as well.

## SCOPE

- Utilizes the H200 generator, tube trailers, and dispensers
- PT50 generator (Legacy Reformer design)
- Generates 300 Kg/day of hydrogen fuel

## HIGHLIGHTS

- Client has scaled its production capacity over time from 100Kg/day of hydrogen to 300Kg/day by utilizing new equipment solutions
- The generated hydrogen is used in fuel cell-powered forklifts in the warehouse
- Serves hardware industry in the Dallas, Texas region
